## Board Supports Roads Program

Endorses Publicity Efforts to Establish "Crow" Route as National Highway

At the meeting of the Board of Trade held on Tuesday, June 12, which was briefly reported in last week's issue of The Journal, a very interesting address on the work of the various automobile associations in mapping roads was given by Mr. A. Baker, of the Western Road Route Service Ltd.

Originally a school teacher, then serving in the war, he took up the work of advocating and organizing local bodies for the improvement of automobile highways about nine years ago, and has been a consistent booster of the Red Trail, known officially as the Trans-Canada No. 1.

He stated that No. 3 strip map showing the highway through the Crownest Pass, was the first published in this form, and the use of similar maps was now contemplated. One of the best ways in which co-ordinated action could be obtained was through local boards of trade, where by recognition was secured not only of other towns interested in the laying out of good highways, but connection was established with the larger organizations under the Associated Chambers of Commerce, which was a clearing house for all matters of resolutions that might come from local boards. Every merchant should give support to a movement of this kind, for through an association something worth while could be achieved, whereas without a vigorous and representative organization of business men it was practically impossible to secure recognition.

Speaking of the route service which he represented he stated that tourist bureaus were organized to give information and serve the motoring public. They were working against the northern interests to have the Red Trail firmly established as the Trans-Canada No. 1, so that it would be recognized as the official route through the Canadian Rockies as part of the national highway from Eastern Canada to the Pacific coast. It was a shorter route than by way of Calgary and the Banff-Vancouver route, and the great majority of tourists from the States preferred the "Crow" route.

Showing the value of the tourist traffic to Canada, he quoted figures for the past three years, showing that the money spent had increased from \$100,000,000 in 1925 to \$200,000,000 in 1927. Hon. Chas. Stewart, in the publication "Natural Resources of Canada," had stated that the tourist industry ranked second only to that of agriculture. Statistics at Kingsgate, the port of entry west of here, from April till the close of tourist traffic, showed approximately 75,000 entries, so that some idea could be obtained of the amount spent by this number. If the north put through their attempted project of making Calgary the hub of the Trans-Canada highway then the "Crow" would lose a large share of the traffic.

Some interesting statistics were given by Mr. Baker concerning tourist traffic, and he stated that last year his organization issued 70,000 strip maps, which were obtainable at all important centres on both sides of the international boundary. He paid a tribute to the efforts of A. M. Morrison, president of Coleman Board of Trade, for his unceasing efforts on behalf of the Red Trail, and urged not only Coleman but every town on the Red Trail in Southern Alberta to get behind any move to have it officially recognized by the entire province as such.

After discussion and questions a vote was passed authorizing Coleman board to make a grant of \$50 towards publicity work in connection with the Red Trail, the members expressing themselves as being in hearty accord with any scheme that would give the desired publicity to this route.

A. M. Morrison, president of the board, brought before the meeting a suggestion which had been made that Blairmore and Coleman unite in a plan to improve a section of the road from Crow's Nest station to Corbin. At present there is no road, and the people there are desirous of coming to the Pass towns. It would require about \$500 to do the work, of which Coleman and Blairmore would contribute half each. As there was very little information at hand the meeting decided that Mr. Morrison secure additional information and place it before the annual meeting of the board to be held on June 21.

A vote of thanks by R. F. Barnes and O. E. S. Whitehead was passed to Mr. Baker for his address, and in acknowledging the latter stated that it was a source of satisfaction to himself to have aroused interest in the subject for which the meeting was called, and he hoped that all the towns along the route would get behind any organized effort to secure for the "Crow" route its just due.

## There'll Be Big Crowds to See "The Circus"

Chaplin's Masterpiece Will Be at  
Palace Theatre on Friday  
and Saturday

Ladies and Gentlemen—and kiddies all—step this way and see Charlie Chaplin at his funniest in "The Circus," undoubtedly the greatest of all comedy masterpieces—a low-browed comedy for high-brows. Others may imitate, but never successfully, the inimitable Charlie. See him among the lion tamer and acrobats, in the land of clowns, on the wire among freaks or trying to be a lion's friend. When a staid magazine gives four pages of review to a comedy film, then it must be "some film." There should be packed house for both nights of this rollicking riot.

## General Motors Will Build Plant at Regina

Will Develop Industrial Payroll  
for Skilled Workers in Western  
Capital City

The announcement that a million dollars will be spent by General Motors of Canada, Limited, on the erection of a manufacturing and assembly plant at Regina is a very practical form of the optimism which one of the country's largest manufacturers has for the future of the Canadian West.

Establishment of the Regina plant is in pursuance of the General Motors policy of placing assembly plants, where volume of sales warrants, as near as possible to the centre of distribution for the particular territory. Increasing General Motors' business throughout Western Canada has made the establishment of the Regina factory a logical move.

"It gives me the greatest pleasure to confirm the statement that we are about to establish a large plant in Regina," said R. S. McLaughlin, president of General Motors of Canada, Limited. "The west has always supported the McLaughlin company in General Motors, its successor, in splendid fashion. We feel doubly happy therefore, that by establishing an important plant in Regina we can put back in payroll and local purchases some of the business which western preference for our products has brought."

The city council of Regina and the General Motors executives have signed an agreement for the purchase of 38 acres of city property. Construction will be rushed and it is hoped to have the building ready for occupancy and production not later than December 1st of this year.

The new General Motors factory will be Regina's largest industrial plant in volume of output, floor space and number of workers employed. Announced as the first unit in a programme to be developed as conditions warrant, it is to cost approximately \$1,000,000. It will be devoted not only to the assembling of Pontiac and Chevrolet automobiles but also to body building, painting and trimming operations. In this respect it is more comprehensive than other "assembly" plants established by the company. When the plant opens, the working force will be gradually increased until it is expected that at peak production the number employed in plant and office will be from 650 to 800.

Attending the convention of the Great Chapter of the Eastern Star for Alberta last week at Al Athar temple, Calgary, were Mr. and Mrs. Robert Evans, Mrs. Dewar and Mrs. Gillis, who went by auto, and Mr. M. W. Cooke and Mrs. Andrew McLeod. A very enjoyable and interesting convention was held. Despite the bad roads caused by heavy rains on the return trip, Mr. Evans piloted his car back in 8½ hours.

Margaret McDonald left recently for Edmonton, where she met her mother to journey east to Nova Scotia to spend the summer months, the latter having come down from Brule, Alta., to meet her.

## TAKE ADVANTAGE OF NATIONAL ADVERTISING

It has been discovered that the typical chain store handles less than twenty-five individual items, whereas the typical grocery carries nearly ten times that number of items and the large groceries, catering to a select clientele, four to five thousand items. To no small extent, the comparatively low overhead cost per sale in the chain store is due to the rapid turnover secured by carrying only a rigidly limited number of popular items which have already been brought to popular attention by persistent national advertising.—From Royal Bank of Canada Monthly Letter.

## THE COAL INDUSTRY

It is gratifying to learn that mutually satisfactory agreements covering the next two years have been entered into between the coal companies and miners operating in the Crow's Nest Pass coal districts of British Columbia and Alberta. This assures for the industry the stability it needs to recover from the disastrous effect of the years of contention and labor agitation of the United Mine Workers of America, with recurring suspension of mine operations and disorganization of markets. The improved condition of the industry at Fernie and Michel, following three years of peace and goodwill between employers and employees, shows the mutual benefit that results from such a desirable arrangement.

The International Coal and Coke Co., last month made its agreement directly with its own employees through they are organized under the Mine Workers Union of Canada which fortunately has no affiliation with the United Mine Workers of America, although that body is still active in the coal fields of Northern Alberta. Mining and Industrial Record.

## Personal and Local

Mr. and Mrs. J. T. Griffiths spent the weekend with Mr. Griffiths' brother at Lethbridge.

Mr. and Mrs. J. T. Hopkins Jr., went to Spokane on Sunday's train to spend a holiday there.

The Junior W. A. of St. Alban's church held a successful pantry sale on Saturday last.

H. Snowden was in Calgary for a few days, returning the early part of the week.

Alex. Thanos of the Palm Cafe has been in hospital in Lethbridge for over a week.

Ed Crayford of Lundbreck was here this week visiting his brothers Roland and Fred.

Local news items will be welcomed by The Journal. Leave them in the mail or send to the office direct by letter or telephone 209.

A road crew of the department of Public Works has been at work during the week, their camp being in the tourist park.

Another carload of Durant cars was unloaded by Alex. M. Morrison this week, for which there is a brisk demand.

Dr. Groff, of Edmonton, medical director of the Workmen's Compensation Board, was here last week inspecting several cases under compensation.

Coleman Town Band is making steady progress, regular practices being held in preparation for the competition to be held in Calgary the first day of the exhibition.

On Wednesday next Pincher Creek baseball team will play Coleman here. This is a league game of the Crow's Nest Pass League, and there should be a good turnout to support the boys.

Frank Graham returned on Friday afternoon from Edmonton, to where he and Mrs. Graham had been called by her father's illness. He is now on the way to recovery and plans on making a visit here.

A motor cyclist passed through town on Friday last on his way from Vancouver to Montreal. He had made rapid progress from the coast, but anticipated delays as he proceeded further east owing to heavy rains.

## PEOPLE WE HAVE MET

Mayor William J. Burns

For several years Mr. Burns has filled the mayoral chair and has been an energetic worker for the town's welfare. Though his work as engineer at the McGillivray power house demands his daily attention for the greater part of the day, yet he always makes time to attend to his duties as chief executive of the town, and besides takes an active part in fraternal organizations, being a past master of Summit Lodge A. F. & A. M., and an officer in the L. O. O. F. His re-election several times in succession is an expression of the confidence the ratepayers have in him as mayor. He is a native of the old province of Quebec, and has been a resident of Coleman for about twenty years.

## ST. ALBAN'S CHURCH

Service last Sunday evening was in charge of the Rev. V. S. Lord, of Brockton, who took the service in the morning at Blairmore. Next Sunday the service at St. Alban's will be held at 7 p.m., the Rev. Neville Blunt of Pincher Creek officiating.

Choir practice will be held on Friday (tomorrow) evening at 7.30.

Commencing the first Sunday in July, services at St. Alban's will be held in the morning only, time of the service to be announced a week previous.

The Rev. A. D. Currie left on Monday morning to spend a month's holiday with friends at Parry, in the Nelson district of British Columbia, and during his absence services will be in charge of the Rev. V. S. Lord and the Rev. Neville Blunt. Through ill-health Mr. Currie was instructed by the Bishop to take a complete rest from his duties, and his parishioners trust that a change of environment will restore him to health so that he will resume service on his return.

A. B. Baker, manager of the Western Road Route Service, Calgary, is in the city today. Mr. Baker, following a conference with members of Cranbrook board of trade, will proceed to Spokane tomorrow on business connected with tourist routings in the U. S. and Canada. Mr. Baker is one of the live wires of the International tourist information service. Cranbrook Courier.

## Campaign Gets 50 Members

Canvas Last Saturday Secured a  
Good Response to First Lap  
Membership Campaign

Whether it was Chief Houghton's brass buttons, his gleaming badge in his cap or his persuasive ways, that was responsible for him gathering in over fifty members for the Board of Trade, it is hard to say. The fact remains, however, that none could resist him, and most of those approached paid him the membership fee with a smile. Even the mayor of Bushtown came through without being asked. He was sitting in the Grand Union building a quiet glass of beer, and seeing the proprietor and his assistant passing over a dollar each, for which they received the membership pasteboard, wanted to know what it was all about. He was informed that the Board was trying to give things generally a boost, and someone went as far as to say they were even trying to get electric lights and water service into Bushtown. This appealed so much to the enquirer that he promptly handed over his membership fee with a smile, quite agreeing that it was a splendid thing to belong to the Board of Trade.

Even the Chinese laundryman, Mr. Goody, "kicked the bucket," evidently believing that some of the tourists who may pass through this summer may leave the odd bundle of washing, while at the Coleman Cafe Long Kam and his chief cook John Leong enrolled under the banner of the board. Wherever there was a chance to sell a membership ticket the chief seized upon it with avidity, turning a deaf ear to excuses, which were very few.

Generally speaking the public realize that there is plenty of work for the board to do and were willing to get behind it. Following is a list of those whose names were secured in the first canvass, to which more will be added:

E. Ledieu, S. Lesocky, S. Klejko, Joe Kapalka, Robert Bell, William Bell, Val Gabino, R. Crayford, W. Michalsky, Tom Boland, C. Proso, W. J. McGrath, W. Walker, S. Janostak, N. P. Eastwood, D. E. McLean, C. L. Goody, O. Oliva, W. Michalsky, J. Michalsky, W. Evans, Sid Short, J. Rushton, Coleman Hardware Co., D. Gentile, J. Wood, F. Graham Sr., Radio Cafe, G. W. Powell, J. M. Allan, Mrs. Kerr, M. W. Cooke, C. Nicholas, C. Pattinson, J. A. McDonald, A. M. Morrison, Eric Bergquist, S. Moore, F. Antroub, Al Holyk, S. Ewanec, G. Neil, N. Bortnack, D. Lloyd, P. Rinaldi, Long Kam, Joe Leung, J. Houghton, H. T. Halliwell, J. McLeod, Jas. Scott.

Coleman baseball team played against Blairmore in the Crow's Nest league school last evening at Blairmore, winning by a score of 10-8.

East Is Coming West

The recently announced decision of the General Motors Corporation of Canada to proceed immediately with the erection of a million dollar manufacturing and assembly plant at Regina is gratifying news, not alone to the citizens of the capital city of Saskatchewan, but to all Westerners, because it indicates that at long last the leaders of industry in the East have come to a realization of the fact that they cannot continue indefinitely to supply the rapidly growing western market from factories located thousands of miles away, and compelling the western purchaser to pay greatly enhanced prices by reason of freight charges based upon the high classification imposed upon finished articles.

Western people have contended for some time now that the logical industrial development in Canada is the establishment of branch factories in the West. There was a time, not more than a couple of decades ago, when the view prevailed that the western market could be supplied not only from Eastern factories, but from Eastern wholesale houses. Gradually, as western population grew and the volume of business increased, branch wholesale houses were opened in Winnipeg, and since they have gradually spread all over the West, until today wholesale establishments located in all the larger western centres of population very largely supply western needs.

The same development which thus characterized the business of wholesaling and distribution must inevitably now follow in the work of manufacturing itself. Freight charges on the transportation of necessary raw materials into the West will be substantially lower than charges on the finished products, while the opening of western factories may, and in all probability will, encourage the production for use of certain raw products of the West which today lie undeveloped because of a lack of market.

The decision to locate branch industries in the West is furthermore pleasing to Western people because it indicates recognition by Eastern industrial leaders of the fact that, if they are to command the support and sympathy of the West, and if past lines of separation between east and west are to be wiped out, and a new national viewpoint developed, the East cannot continue to merely accept the cream of western trade and profits in years of good crops and times of plenty, but must come west and throw in their lot more wholeheartedly with the people here and, while benefitting in years of abundant prosperity, also carry their share of the burden in years of slim crops and business depression.

With wonderful activity prevailing in the work of prospecting and developing the immense mineral areas of the northern portions of the three prairie provinces, with large schemes of power development now receiving attention, and with the new, larger, more national viewpoint gaining headway among the financiers and industrial leaders of the East, there is every reason for saying that a new era in the history of Western Canada is opening.

While the West will long continue to excel as an agricultural country, and will steadily expand its annual production from its rich prairie lands, it seems safe to predict that from this time onward industrial development will move along in keeping with the agricultural growth and mineral development of the country.

Such development offers the best and most practical solution of one of the West's big problems, namely, the unemployment difficulty which annually presents itself because of the seasonal nature of the best industry of this country. In this connection it is pointed out that the "peak" period of production in Regina's new industry will be in the late winter and early spring months, before active outdoor building operations, railway construction and road making gets under way, and when under present conditions unemployment is at its maximum.

Viewed from all standpoints, therefore, the whole West can unite in welcoming the momentous decision of one of Canada's greatest industrial concerns to establish a large branch plant in the heart of the prairie west. Its action will be but the forerunner of many similar decisions by other large manufacturers, and a resultant development from which every Western centre, and every Western citizen, will benefit.

## Alberta Sells Railway

Purchasers Obtain Rights and Titles To the Lacombe and North-Western Railway

A cheque for \$1,510,522.29, turned over to the provincial treasurer of Alberta, by the Canadian Pacific Railway, on May 10th, purchased the Lacombe and Northwestern Railway. The company obtained full possession, right and title of the latter property, with all securities and capital stock of the land of the company. The new directors are: D. C. Coleman, vice-president of the Canadian Pacific; G. A. Walker, solicitor at Calgary; George Fox, superintendent at Edmonton; C. D. Porter and George Hutton.

## "A GREAT TONIC," SAYS MRS. RUSSELL

After Taking Lydia E. Pinkham's Vegetable Compound

Penwick, Ont.—"I am taking Lydia E. Pinkham's Vegetable Compound during the change of life for nervous forces, loss of appetite and to gain strength. It is a great tonic and I have taken a dozen bottles of it. It was recommended to me by a friend and now I recommend it to all women for such troubles as come at this time."

—Mrs. W. V. Russell, R. R. No. 5, Penwick, Ontario.

W. N. U. 1737

## Air Patrol On Hudson Straits

Strails Open For Navigation Much Earlier Than Even Friends Of Route Anticipated

Flying operations have been resumed in Hudson Straits, and reports from the air bases reveal that the ice has already cleared out of the eastern end of the channel and is broken up in the centre and western sections. It is the opinion of the air men and marine officials stationed in the straits that an ice breaker could open a channel right through the straits at present. No ice breaker is available, but the department announces that a vessel of this type will be available before next spring.

The time when the straits will be become easily navigable is as yet doubtful, but it is quite clear that ice conditions are not nearly as heavy a handicap as has always been supposed and that the straits will be open much earlier than even the friends of the route anticipated.

## AVOID THE PAINS OF RHEUMATISM

This Trouble Comes Through Weak, Watery Blood

Many people suffer rheumatic pains that could be avoided by building up the blood. Rheumatism, with thin, watery blood, and can only be driven out of the system by enriching the blood with new blood. Make rich, red blood no medicine equals Dr. Williams' Pink Pills. These pills actually make new blood, driving out all poisonous secretions, and creating a condition of robust health.

Thousands of rheumatic sufferers can testify to the value of Dr. Williams' Pink Pills. Among them is Mr. J. S. J. Bole, of Toronto, Ont., who says:—"As a worker in the woods for years I was exposed to all kinds of rough winter weather. The result was that I was finally laid up with rheumatism. The next winter I was confined to bed. Medicine seemed to have little or no effect and the best encouragement I could find gave me was that with the coming of warm weather I would be better. But instead of getting better, I grew worse. My joints were badly swollen, and my legs so stiff they would hardly support my body. At this stage I read that Dr. Williams' Pink Pills were recommended for rheumatism and decided to try them. The results were beyond my expectations. After a few weeks the swelling had disappeared, and the stiffness gradually wore away, and much sooner than I expected all traces of rheumatism had disappeared. The next winter when I went into the woods I took with me a box of Dr. Williams' Pink Pills with me, and they kept me in the best of condition. My experience should give encouragement to other rheumatic sufferers."

You can get these pills through any dealer in medicine, or by mail at 50c a box from Dr. Williams' Medicine Co., Brockville, Ont.

## Great West Airways

First Commercial Flying Company On Prairies Is Established At Calgary

Backed by many of Calgary's prominent citizens, managed by Capt. F. R. McCall, D.S.O., M.C., D.F.C., and known as the Great West Airways, Limited, the first commercial flying company on the prairies west of Winnipeg, is expected to be in operation within one month, with Calgary as base, it is announced. The objects of the company are to carry on the business of aviation with its branches, including the giving of instruction to pilots and air engineers.

For Sprains and Bruises.—There is nothing better for sprains and contusions than Dr. Thomas' Electric Oil. It will reduce the swelling that follows a sprain, will cool the inflamed flesh and draw the pain. It will take the ache out of a bruise by counteracting the inflammation. A trial will convince any who doubt its power.

Britain's Air Mail Grows

Air mail activities in Britain are growing rapidly. Letters dispatched from London last year totalled 27,000 pounds, as compared with 17,000 in 1926. Air parcels were 74,000 pounds in 1927, and only 55,000 pounds in 1926. Ten thousand pounds of letter mail were carried to European destinations alone in the past 12 months.

Many people are almost crippled with corns. But it is needless suffering which can be speedily ended with Holloway's Corn Remover.

Many men who complain about playing second fiddle ought to be glad they are in the orchestra at all.

## BOILS.

## Another New Job

Airplane Despatchers Will Use Radio To Keep In Touch With Machine

Radio has moved the way for another new job—the airplane despatcher. Much like its predecessor, who is responsible for the operation of the train, the despatcher's schedules, his task will be to keep airplanes going in the right direction and to give aid in cases of emergency. But the land wires the train director uses are not to be part of the system. Radio will be the connecting link between ground and airplane.

The equipment that again will bring radio into practical contact with the work of the twentieth century despatcher is being installed in the western sector of the transcontinental air route. Ground radio stations are being set up, and a despatcher will be in charge of each one.

Most of the direction by radio will be done at night, when the plane's pilot must depend on his compass or light beams spaced at intervals along his route. These beams are erected on towers, and contain lights with a candlepower of 4,000,000.

With intermediate fields no further apart than thirty miles, and each equipped for despatching by radio, the new service will remove much of the isolation from air transportation.

## New Market For Purebred Hogs

B.C. Branch Of Canadian Swine Breeders' Association Cultivating Market In Antipodes

For the past year the secretary of the B.C. branch of the Canadian Swine Breeders' Association has been engaged in seeking new markets for purebred hogs, paying special attention to Australia and New Zealand. As a result many demands have been received, interest being stimulated by New Zealand's removal of all duties on stock with a clean bill of health.

No Rest With Asthma.—Asthma usually attacks at night, the one time when rest is needed most. Hence the loss of strength, the nervous debility, the loss of sleep and other evils which must be expected unless relief is secured. Fortunately relief is possible. Dr. J. D. Kellogg's Asthma Remedy has proved its merits through years of service. A trial will surely convince you.

Labor Shortage In Dawson

There is a scarcity of labor in the Yukon, particularly in Dawson and White Horse. Fifty to seventy-five laborers are needed during the summer season until the mining camps shut down about the first of October. The work offering is on dredges, hydraulics and around mining camps. Longshoremen's work is somewhat irregular later in the season, but fairly steady while ore shipments from Mayo are in progress. Wages on the Dawson dock are from 90 cents per hour to one dollar.

A safe and sure medicine for a child troubled with worms is Mother Graves' Worm Extirminator.

Gold Medal For Edison

His 1928 gold medal for Science has been awarded by the Society of Arts and Sciences to Thomas A. Edison, the inventor. Plans for a large public testimonial in New York when the Medal is formally presented to Mr. Edison are nearing completion. It is expected that the event will bring together ambassadors of foreign governments and heads of leading scientific societies, universities and industries.

Children may cry for the moon until they get big enough to want the earth.

The outcome of a basketball game and buckwheat cakes depends upon the batter.

When in doubt as to what to say suppress your thoughts.

## FREE DENTAL SERVICE

Nearly One Thousand Saskatchewan People Given Free Treatment By Travelling Clinic

Nearly one thousand people in scattered sections of Saskatchewan, most of whom were from 40 to 125 miles from a dentist, were given free treatment by a travelling clinic. Most of these, moreover, would have been financially unable to secure it even if dental services had been easily available for them, otherwise.

Approximately 100,000 children throughout Saskatchewan were given a thorough mouth inspection and presented with charts showing the exact state of their oral health and telling them what should be done about it. Hundreds of addresses were delivered in all parts of the province. Moving pictures were shown in theatres and public halls from the U.S. Border to the far north and 85,000 books and pamphlets on dental health distributed free of charge. Over a thousand children wrote essays on "Mouth health and the foreign as well as the English-speaking population, was supplied with accurate information on the subject.

In brief, in a 60-day period, nearly 536,000 persons were given a course in preventive dentistry.

These are the results of an intensive Mouth Health Programme just completed here under the auspices of the Canadian Dental Hygiene Council. They are given in detail in the report of Dr. Harry S. Thomson, field secretary of the organization. This report, which is to be published shortly, tells the story of one of the most remarkable co-operative efforts for better general health which has ever been successfully attempted in the Dominion.

For Farming Leases

Already there are 300 applicants for fur-farming leases in the swampy St. Paul de Metis district of Alberta, recently made available for fur-farming purposes.

Minard's Liniment For Insect bites.

To Attend Dairy Conference N. S. Godding, of the dairy faculty of the University of British Columbia, will represent that province at the World's Dairy Conference in London this year.

## MAGIC BAKING POWDER

IS ALWAYS RELIABLE E.W. GILLETTE CO. LTD. TORONTO, CAN.

## Japan Buys Canadian Poultry

Japanese Government To Purchase Birds For Experimental Farms

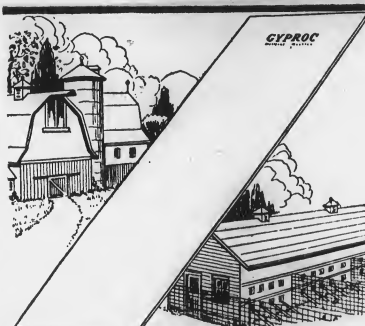

According to a recent report, the Japanese Government has sanctioned a programme for the purchase of 1,000 birds annually, for five years, for its five experimental farms. Some of this poultry will probably be bought in British Columbia, and is one more evidence of the splendid publicity which Canadian stock received at the World's Poultry Congress in Ottawa last year.

Miller's Worm Powders are complete in themselves. They not only drive worms from the system, but repair the damage that worms cause, and so invigorate the constitution that it speedily recovers from the disorders of the digestion that are the result of the work of these parasitic intruders. They do their work thoroughly and strength and soundness follow their use.

Lindbergh's famous plane, the Spirit of St. Louis, has been placed in the Smithsonian Institution at Washington. Years hence, folks will look at it and say: "Wonder how he ever did it in that old crock!"

For Hay Fever—use Minard's.

Nearly 50 men of more than 60 years of age are inmates of Canadian prisons.

## "Modernize" Your Farm This Modern Way

Nearly every building on the farm can be greatly improved and "modernized" by Gyproc.

This famous wallboard is recommended by leading contractors for both new and old construction because it gives advantages offered by no other material—fire-safety, rigid strength, economy and cold and heat resistance.

All these vital advantages! And you get them for nothing—because Gyproc costs no more than products that have none of Gyproc's remarkable qualities.

Gyproc makes durable, permanent walls and ceilings in less time and at less cost. Gyproc Joint Filler on the joints assures a smooth flat surface which takes any decoration—particularly suitable for Alabaster.

SEND FOR FREE BOOK

Canada Gyproc and Alabaster Limited, Winnipeg, Canada. Please send handbook free booklet, "Walls that Reflect Good Judgment" which contains valuable information on Gyproc for farm use.

Name \_\_\_\_\_ Address \_\_\_\_\_

## Gyproc Advantages for Farm Buildings

Easy to use. Low cost. Workable as lumber. Cannot wear, bulge, crack, shrink or burn. Takes any decoration. Resists heat and cold. Vermin proof. Eliminates repairs. Protects your stock. Ideal for lining garages, poultry houses, barns, grain bins and other farm buildings. Especially suitable for converting outhouses and barns into extra rooms.

## "EMPIRE"

Fireproof Wallboard

## PLANS MADE TO BROADEN WORK OF POOL

Regina.—At the final session of the third International Wheat Pool Conference held here, it was decided to broaden out the work of the International Conference. Under the new plan Co-operative Producers and Co-operative Consumers the world over may be brought together in one large co-operative body, but each retaining its identity as an individual co-operative unit. In this connection the following resolution was passed:

"Whereas the values to the various co-operative associations of meeting in conference have been established; and it is resolved that national co-operative committees be formed for the purpose of furthering such conference and that such national committees appoint representatives to the International Pool Conference Committee."

Another important conclusion to which the delegates came was, that the International Conference, again next year be left to the discretion of the International Committee which has charge of arranging details of this Conference.

In explanation of the national committee's resolution it was pointed out that the present International Conference Committee is representative only of wheat pools, wheat marketing organizations. The Conference this year had been held in its scope and for the first time representatives of certain other co-operative organizations had been admitted as delegates.

By the formation of national committees, it was further stated during the discussion on the resolution, which would include representatives from Canada, the U.S.A., Australia, and possibly later on the Argentine or any other wheat exporting country, the existing committee was of opinion that a broader representation could be sent to the International Conference. The present International Conference is to remain in its instance and make the first move toward the formation of these national committees. This will be done, it is indicated, by way of a call from the committee to all the co-operative organizations in Canada to meet and form a Canadian national committee. Following this representatives would be appointed who would join hands with those of similar national committees in the other countries that might desire to participate and thus the International Conference would be representative of all classes of co-operative producer endeavor.

## Not Wanted in England

HARRY THAW TO DEFEND PERMISSION TO LAND AT SOUTHAMPTON  
Southampton, Eng.—Harry Thaw, arriving at Southampton aboard the Aquitania for a visit to England, has refused permission to land in the immigration officials. Thaw had obtained a British visa before sailing but nevertheless was not allowed to land. He was informed that the visa had been issued in error of prohibition and it is supposed that he will be obliged to return to New York on the Aquitania.

Many Nations Represented  
Toronto.—It is expected that 65 nations will be represented in Toronto when the Baptist World Alliance holds its fourth congress here, June 23-29. About 7,000 delegates are expected, representing some 12,000,000 baptists throughout the world. The roll call of nations on Saturday, June 23, probably will be the most picturesque session.

John Was Costly  
Hallebury, Ont.—Touching a match to the gasoline-soaked clothing of his friend, John Burton, year cost John Pittsley \$800 and costs, Burton spent several weeks in hospital, and nearly lost his life. He was out of work five months as a result of the "joke."

Expect Cable Conference Report  
London.—The report of the Imperial Cable Conference, in which the Dominion governments are represented, will be made shortly, the Canadian Press has learned. It is believed the committee will produce some scheme for maintaining cable communications intact.

No Danger Of War  
Toronto.—Sir John Alder, president of the Canadian Bank of Commerce, after an extensive trip in Europe, stated in an interview here, that he considered that there was no danger or another outbreak of war.

W. N. U. 1737

## No Evidence Of Grafting

Immigration Inquiry Report Exonerates Members Of Parliament  
Ottawa.—The parliamentary immigration inquiry report was tabled in the House of Commons. The document contains little of a drastic nature, but thirteen recommendations for the improvement of Canadian immigration activities in Canada.

Evidence in detail respecting the organization of the department of immigration was heard at thirty-six meetings of the special committee, which conducted the inquiry. All phases of the department's immigration and colonization work—carried on both separately and in conjunction with governmental and voluntary organizations—were examined into and the testimony of a long list of witnesses was received.

Ald. M. J. Coldwell, Regina, who made charges last summer that members of Parliament had trafficked in special immigration permits, was numbered among the witnesses. The report contains no findings of wrongdoing or trafficking in special immigration permits by members of the Federal Parliament or others. Tabling of annual returns at each session of Parliament showing particulars of the permits granted in 1926, suggested. Steps to speed up British immigration to Canada by improving the overseas medical inspection system and the granting of assistance to young Canadian agriculturists, similar to that given by the British authorities to British emigrant boys featured the report. Efforts towards reduced ocean passage and railway rates are also advocated.

## Pass Estimates For Defence Department

Amendment Presented To House On Cadet Training Deferred

Ottawa.—When estimates of the Department of National Defence were before the House of Commons, Miss Agnes MacPhail, Progressive, Southeast Grey, moved that a vote of \$500,000 for cadet service be reduced to \$1. Miss MacPhail's amendment was declared lost and the item itself carried.

During the debate, Miss MacPhail asked Hon. J. L. Ralston, Minister of National Defence, how he accounted for the fact that the government was the only one which "interfered" with education which was under provincial jurisdiction.

To this the minister replied that no action was carried out without the consent of the provincial governments. No teacher was compelled to take cadet training nor were any of the schools under compulsion to do so. He declared the treatment of cadets of peace were those who had done their share in military training in their youth.

Included in the votes were \$2,315,000 for the non-permanent militia; \$4,000,000 for the permanent force; \$7,725,000 for the naval services; \$1,609,694 for the Royal Canadian Air Force, and \$3,195,000 for civil air operations.

## Conducting Another Search For Fliers

Quebec Man Believes Nungesser and Coll Landed in Labrador

Quebec.—That he was morally convinced that the French fliers, Nungesser and Coll had landed with their monoplane, White Bird, somewhere in the Labrador country and that he had the intention of conducting a new search party this summer in that district was the statement made here by Dr. Louis Cuisinier, Dr. Cuisinier has returned from Greenly Island, where he had gone to the rescue of the stranded crew of the Brennan, Dr. Cuisinier said that the search party would be sent in specially equipped aeroplanes.

Burial Of Hon. C. W. Cross  
Edmonton.—With every manifestation of sorrow and respect, the body of the late Charles W. Cross, K.C., first attorney-general of Alberta, and since 1905 prominent in public life in the province, was laid to rest here. The crown, the province, the city, bench and bar, the various other learned professions, and men who are leaders in many diverse activities united in the last tribute. The funeral service was conducted by Rev. Dr. D. G. McQueen, pioneer Edmonton pastor.

Change Is Approved  
Toronto.—Reorganization of the Canadian Dental Association with provision of an executive body in which all provinces will have representation, was approved at the annual convention. Dr. J. W. Clay, of Calgary, president, stated the change would make for a strong national body.

## Reindeer For Northern Canada

Would Supply Food For Eskimo Bands in Northern Areas

Ottawa.—Importation of herds of reindeer into the Mackenzie basin with a view to supplying food for the Eskimo bands who inhabit this remote part of Canada is being undertaken by the government.

In the House of Commons, when estimates of the department of Indian Affairs were under consideration, Hon. Charles Stewart, minister in charge of the department, told of privation which had been suffered by the Eskimo in the past and the efforts which were being made to eliminate it.

Mr. Stewart also informed the House that the department was having some trouble providing relief for Indians in the northern territories and declared something must be done, in co-operation with provincial governments, to provide hunting grounds outside the present reserves. If placed in competition with white men the Indian would starve to death.

## CONSUMERS OF BRITAIN HAVE NO FEAR OF POOL

Regina.—At the International Pool Conference held here, a message of goodwill was brought by the delegates from the British Isles.

Four distinguished visitors from England and Scotland told the conference of the desire of hundreds of thousands of co-operative consumers in the Old Land to remove the barrier that appears to exist as between the two classes of co-operatives and each work for the other in complete accordance with the one object in view—the creation of a truly co-operative body composed of both producer and consumer.

A. W. Golightly, representing the English Co-operative Consumers' Organization, broke the ice on the question and told of the suspicion with which the creation of the wheat pools of Canada was viewed at the start. The Rochdale co-operative, he said, had had bitter experiences in the last 70 years with trusts and combines, and the formation of the wheat pools had first appeared to them as a trust in another guise. He frankly told how his organization had wondered whether it meant another effort to squeeze the co-operative consumer, whether one class of co-operative would be set against the other. He added that the power which the Canadian pools possessed in the economic structure of the world was something of which they were proud.

Alarm, however, had given way to admiration. "I am satisfied after meeting your leaders, after listening to inspiring addresses, after hearing your general sales manager, to go back to my friends in England and tell them that the Canadian people have adopted the best method of handling their product co-operatively," he added, amid loud and prolonged cheering from the delegates.

Mr. Golightly's colleagues amplified his remarks and Peter Malcolm of the Scottish co-operatives, caught the fancy of the audience by saying that his organization desired to buy the wheat of Western Canada, raised and sold in a co-operative way, in order to use it in the bread co-operatively made by his people and sold to those who were in his co-operative society. "The vessels that bring your co-operative grain to us should return to you with our co-operative made goods," he said.

## U.S. PRESIDENTIAL POSSIBILITY

The present United States secretary of commerce, Herbert Hoover, is regarded as the leading Republican candidate for the presidency of the United States. The above is the most recent portrait of Mr. and Mrs. Hoover taken at their Washington home.

## PRESENTED AT COURT

Miss Ruth Draper, the American actress, caused a stir in English society when she was presented at court. In the past the understanding has been that it was useless for any actress to seek presentation while she was still actively engaged in her profession, but that general ban on stage folk has been a dead letter since the days of Queen Victoria.

## Agree On Peace Pact

No Difference Of Opinion Between Canada and Britain

Ottawa.—There is no conflict of opinion between the Prime Minister of Canada and Sir Austen Chamberlain, British Foreign Secretary, with regard to the proposed Kellogg treaty for outlawing war.

This was made clear by Premier Mackenzie King in the House of Commons, when he replied to a question put by E. J. Garland, U.F.A., Bow River.

Mr. Garland had drawn the attention of the Prime Minister to his answer to C. H. Chan, Conservative, St. Lawrence-St. George, on May 18, when Premier King declared that it was erroneous to suggest that the British Government could not sign the Kellogg treaty without the concurrence of the Dominions.

Premier King referred Mr. Garland to his communication to Mr. Kellogg where he had set forth that the treaty would be submitted to parliament.

## Request For Railway Cars

None Available and Fish Shipments Accumulating At Prime Rapids

Ottawa.—A request for railway cars to carry an accumulation of halibut from Prince Rupert, B.C., to the Eastern markets was made in the House of Commons by J. C. Brady, Conservative, Skeena.

Within the last few days 490,000 pounds of halibut have been brought to Prince Rupert ready for market.

Only three cars were available and these had been secured by U.S. shippers. He asked the Minister of Railways to take some action to assist the Canadian shippers to obtain cars.

Hon. C. A. Dunning, Minister of Railways and Canals, promised assistance.

## To Honor Airmen

Winnipeg, Man.—In honor of four gallant pioneers of the air, four new stations in the western region of the Canadian National Railways have been named Fitzmaurice, Lindsburgh, Aleck and Hinchcliffe, and a fifth to be called Endeavor, the name of the plane in which Walter Hinchcliffe and Hon. Elsie MacGill attempted to fly the Atlantic.

Universities Elect Dr. Laing  
Montreal.—Dr. G. H. Laing, dean of the faculty of arts of the University of Saskatchewan, Saskatoon, was chosen president of the National Conference of Canadian Universities at a session of the conference.

## May Hold Exhibition Of Canadian Goods

Plan For Publicity Campaign In Britain Being Discussed

London.—Canadian products should become very well known in Britain if Parmelee's scheme succeeds. Exhibitions of Canadian products are going to be held in the near future at Birmingham, Aberdeen, Belfast, Manchester, Glasgow, Dublin, Leeds, and Bristol, and a striking publicity campaign will be put into operation. A permanent staff, composed entirely of Canadians, will be created in London so as to be ready at any moment to run exhibition campaigns on behalf of Canadian products. Canadian artists will design the stalling and posters.

Parmelee is staying two months in order to perfect the scheme, which has been welcomed by trading authorities and the British government as a noteworthy enterprise.

## PROTEIN CONTENT BEST BASIS FOR GRADING WHEAT

Ottawa.—The proposal that the protein content be made the basis on which wheat be graded was dealt with by the committee on agriculture in its report submitted to the House.

It came to the conclusion that the nearest approach to an ideal index of the baking strength of wheat was the protein content, the variety and quantity of protein, the latter to be ascertained by chemical test. At present the baking strength is determined on the variety and percentage of hard kernels.

The report stated that so far as export trade was concerned there was not sufficient evidence as to the effect of the proposed change from the present system of grading to that of the protein test to warrant a recommendation that it be adopted, but it recommended that a full inquiry into that phase of the question be made.

The committee also urged that seed wheat be maintained to collect and distribute seed of approved varieties; that an experimental flour mill be established and that inspectors be stationed at all transfer points between the head of the Lakes and the seaboard in order to prevent mixing of wheat.

The changes, if carried out, would necessitate amendments to the Canadian Grain Act.

The resolution states that in Canada, Great Britain and the U.S., and probably most other countries consuming Canadian wheat, baking strength is an important factor in deciding its value, and this strength means the quantity and quality of protein.

Except in the case of Durum wheat, which is graded in a class by itself, and possibly one or two other varieties grown in relatively small quantities, the protein in contract grades could be assumed to be good quality.

Cost of making protein tests should range from 50 to 75 cents, which would not be a serious difficulty notwithstanding the fact that laboratories would have to be installed at all inspection points. The committee suggested that data be obtained as to the cost of installing and maintaining laboratories. Individual tests would require about two hours. A large number of tests could be conducted simultaneously and there would be no delay in testing and dispatching cars to terminal points.

The definite proposal in the resolution could be put into effect insofar as carload shipments were concerned but the committee was not satisfied that wheat sold locally in wagon loads could take advantage of this scheme. This practice of Kansas City wheat pool members, whereby farmers and elevators forwarded supplies jointly to laboratories, pointed a way to solution of the street wheat problem and should be investigated.

Introduction of protein as a factor in wheat grading would be an incentive to grow the best milling varieties.

According to L. H. Newman, Dominion cerealist, and in the opinion of the agriculture committee, these grades are classed as desirable: Early Red Pile, Marquis, Ruby, Red Bona, Redwing, Kennerly, Kitchener, Garret and Reward.

The cereal division of the Federal Department of Agriculture and provincial governments should continue efforts to raise Canada's wheat area with a view as to varieties most likely to prove satisfactory in each case.

The committee expressed the opinion that Garnet Wheat, hitherto excluded from No. 1 Northern, should be eligible for that grade.

## WHEAT CROP IS IN EXCESS OF ESTIMATES

Winnipeg.—The wheat crop of the current year is greatly in excess of the estimates made last fall, according to figures given out by E. D. Cotterell, superintendent of transportation for the Canadian Pacific Railway.

Up to the end of May there had been marketed on the Canadian Pacific Railway 216,370,207 bushels, while the Canadian National reports 264,064,000 bushels, bringing the total of both lines up to 380,434,207 bushels.

Allowing 45,000,000 bushels for feed, seed and grist mills brings the total accounted for up to date to 425,434,207 bushels, and reports show that there are still between 15 and 20 million bushels in the hands of the farmers for marketing.

Up to the end of May farmers marketed a total of 23,465,493 bushels of all grain on Canadian Pacific lines, as compared with 221,029,228 bushels last year, representing an increase of 24,475,266 bushels; loadings totaled 171,726 cars of all grain for the same period this year, as against 149,232 cars last year, showing that the Canadian Pacific is now 22,398 cars ahead of last year's figures.

The Vancouver movement has been particularly heavy, a total of 30,579 cars there are being loaded up to the end of May as compared with 13,798 last year, an increase of 16,780 cars. The export of grain from the port of Vancouver to the end of May amounted to 72,751,252 bushels, as compared with 32,501,691 bushels last year.

## Pension Changes Are Again Before Senate

Amendments Were Not Acceptable To House Of Commons

Ottawa.—The pensions bill with the Senate amendments which were unacceptable to the House of Commons was before the Senate again and referred to the same committee, with the addition of Senator Taylor, responsible for the amendments.

The important issues in dispute are the right of appeal of dependents of pensioners from the decision of the pension board and the right of widows who married pensioners subsequent to their disability from which they died.

At present there are 700 widows who would be eligible for pensions if the House of Commons proposal was adopted.

The pension law regarding dependents at present is that there is no appeal from the decision of the pension board. The Commons amendment would permit of an appeal to the appeal board.

## Planning To Bring Welshmen To Canada

Fifty Thousand Would Come If Dominion Government Give Consent

Toronto.—Plans to bring 50,000 young Welshmen to Canada, suggested by Rev. A. L. Williams and approved by the British Colonial Office, are to be proceeded with if the Canadian Government gives its consent, Mr. Richards stated.

Mr. Richards blames the sole system in England for the present slump in Canadian immigration work over there. "Fellows who have never worked are standing around on street corners—young men of 17 and 20, and what is worse they are now marring on the dole," he said.

Wilkin's Outlines Plans  
London.—Captain Sir George H. Wilkin and his pilot, Lieut. Skelton, are in London for the task of starting something of his plans for Antartica exploration. He will leave for Panama, he said, about November 1, with his actual Polar dog sled to start later from King Edward VII. land, with his objective the area of Graham Land to the South of Cape Horn.

Brandon Goes West  
Brandon.—A Brandon, noted prohibitionist center of the province, went "wet" when the electors voted in favor of the opening of beer parlors in the city. The vote was "For," 3-244; "Against," 1,931, a majority of 1,263.

The tourist who takes his automobile to Europe with him, can now arrange to have it ready for him at the time he lands with his tank filled and the license procured.

## Self Contentment or Progress

The danger of self-contentment is that often it stifles ambition. That is why the younger generation is generally ambitious speaking, far more progressive than older people. They are ambitious, venturesome, willing to take a chance, no matter what the field of endeavor may be—business, sport, aviation, anything you can mention. If you have a town of self-satisfied people who would rather remain undisturbed than putting their energy into use to bring about improvements, you have a town that is on the road to either dying a natural death or else will get into such a rut that it will take a new generation or an earthquake to put new life into it.

Competition is good for the people. It is evident in any line of business. Take a town where there is competition in all lines of business, and the people are better served. It also applies to towns that are served by two or more lines of railroad, where each is out to secure all the business it can instead of waiting for the people to come to them. And so it will be found that self-contentment in business cannot be allowed to take possession of one if he is to keep ahead, for the natural laws of competition will eventually leave the self-satisfied man behind and when he does wake up he will find that it is almost impossible to catch up.

## Commercializing Friendship

In our scramble for existence midst the hurry-furly of our every-day life we are all prone to overlook, forget or minimize the little things which make for the happiness of us all. One of the growing tendencies these days which we think is very harmful in the daily business life of people is the commercialization of friendship. Friendship, whether existing between men and women, is the prettiest alignment that can be made between people; friendship is not to be commercialized, but revered. Poets have written of friendship which exists between a dog and his master, but nowhere has the dog ever been accused of commercializing his master's friendship. A man may become so poor that he is no longer able to feed his dog, but history records many incidents where the dog starved with his master. But not so with men in too many cases. When the dog has become of such physical condition as to be of no more pleasure or service to its master, he is denied his right to live. There are too many cases where friendship exists to that degree of business transacted between the parties. When one is not able to do business with another, in our present day interpretation of friendship, they are business enemies and in most every case they become personal enemies. Every man should strive to have friends, friends who will remain friends when they fail to get your order for a bill of merchandise. Friendship built on business is fleeting and in most every case vanishes. Friendship that is built on business may be true today and gone tomorrow, but friendship built through love that one holds for another rarely severs.—Granbrook Courier.

One cannot wonder that the government refused permission to the International Bible Students Association to broadcast their propaganda by radio, after reading a lecture by one Judge Rutherford, which has been circulated in pamphlet form at 5c per copy. By the way, who is Judge Rutherford? If one of the "organized churches," as this pamphlet terms them, were to slam another organized church in the manner that this Judge Rutherford does, there would be one real uproar.

Trying to settle the matrimonial and family troubles of some of the foreign born residents is a task somewhat like endeavoring to untangle a ball of string that has become inextricably entangled. The court made an attempt at it this week.

The only way in which Coleman's main business street will be given illumination is by the town council taking steps to put in a lighting system. A visitor to town after night has fallen would think he had hit upon a deserted town. It denotes an air of lack of progress.

The Public Works department has certainly lost no time in getting men to work on the road west in the vicinity of the lake. Another instance of showing that if you work long enough and try hard enough for what you want, you'll eventually get it.

More "pep" is needed in quite a lot of people. But they wait for others to supply it.

The best way to entuse others in your business is to be enthusiastic yourself about it.

## Appointed Vice-President

At the recent annual meeting of the officers and directors of McGillivray Creek Coal & Coke Co., Ltd., Mr. George Kellogg, general manager, was appointed vice president of the company. Under his management the company has maintained steady progress since its organization, so that his elevation to the office of vice-president is a well-deserved tribute to his services.

## Here and There

(81) The Duchess of Bedford, latest addition to the Canadian Pacific's fleet of passenger liners on the Atlantic, is the first of four cabin class vessels being constructed for the Canadian Pacific to be added to the company's service on the St. Lawrence route, and they will also be used for winter cruise purposes.

Winnipeg. — According to statistics recently collected from 248,162 farms, there are 6.8 horses to each farm in Manitoba and a tractor to every 4.6 farms in the province. Each Saskatchewan farm has 10.2 horses and there is one tractor to every 4.7 farms. In Alberta there are 10.8 horses to each farm and one tractor to every 7.5 farms.

Ottawa, Ontario. — Employment stood at a higher level in Canada in April, 1928, than in any April as far back as records go. Returns from 6,191 employers of labor with working force aggregating \$24,249 persons, showed the employment index standing at 101.1, as compared with 96.2 in April, 1927, and 94.1 in April, 1926.

Winnipeg.—Homestead entries in the four Western Provinces for the first quarter of the year totaled 1,516, as compared with 1,009 in the first quarter of 1927. Filings in Manitoba were 107, as compared with 125 in Saskatchewan 655 as against 513; in Alberta 982, as compared with 567; and in British Columbia 75, against 12.

The English Rugby League Football team, at the present time touring Australia and New Zealand, is scheduled to arrive at Vancouver on R. M. S. Canada, September 14, and will play a game there next day, leaving on the Trans-Canada afterwards for Montreal where another game will be played September 20, before sailing for England on the Duchess of Athol next day.

Free scholarships to C. P. R. apprentices or employees under 21 or to minor sons of employees of the company covering five years' tuition in Chemical or Civil Engineering at the Ecole Polytechnique of the University of Montreal and four years' tuition at the Montreal School for higher commercial studies are announced by circular over the signature of Grant Hall, senior vice-president of the railway. The scholarships are two in number, one at each of the institutions of learning specified, and are decided by highest standing in competitive examination.

### Paid Back With Interest

A man living in West Coleman was given a severe trouncing on Sunday morning by his wife, in which she hit him with some rocks and knocked one eye out. The police state that there had been previous quarrels between the two, in which the wife had suffered considerably, but this time the wife got the best of the fight and the husband was taken to hospital.

### Expensive Trout

—Cost \$15.25 Each

Fishing Out of Season and Taking Underized Fish Proves Expensive to Ranch Owner

American tourists may be willing to spend as high as a hundred dollars to catch a trout, but local anglers are not so enamoured of the sport that they would relish paying as high. One angler on Sunday, who owns a piece of land through which Allison Creek runs, was of the opinion that the fish in the water there belonged to him, but after Magistrate Gresham had a talk with him and assessed him fines of \$10.00 and \$5.00, with costs added, he felt convinced that it would not pay to try and prove his right to the fish he had caught. The court informed him that fish and game must be protected in order that it may propagate, and thus provide sport for the greater number.

Joseph H. Holmes, overseer of fisheries, asked that an example be made. However, the court did not wish to be too hard, as the defendant stated it was the first time in his life he had fished, and pleaded guilty as soon as the charge was read to him.

### Thelma Jackson Wins Missing Word Prize

Total of 5 Out of 17 Discover Correct Missing Word in Coleman Trading Co. Advt.

When the envelopes containing the replies for the missing word contest were taken from the box by Mr. James Ford, town secretary, the first was Thelma Beatrice Jackson with the word "convinced." The word had been intentionally left out of the sentence in the Coleman Trading Co.'s advertisement last week, which read: "Give us a trial and be....." The remaining correct answers were Lois Thomas, J. Howarth, Winnifred Phillips and Thelma Vincent. The majority of the other answers gave the word satisfied instead of convinced. One reply came from Chapman Camp, B. C.

A dollar is awarded to the first and tickets for admission to the Chaplin comedy at the Palace—"The Circus"—on Friday and Saturday, will be given to the others whose answers were correct on calling at The Journal office.

### School Notes

School re opens after the summer vacation on Monday, the 27th of August.

Beginners will be admitted to the primary rooms at Central and West Coleman schools on that date. Entrants to the grade must be six years of age on or before the first day of October 1928.

Departmental Examinations for High School students commence on Monday, the 18th of this month and continue until Friday, the 29th. The Grade VIII Departmental Examinations start on Monday the 25th.

Students desiring to take up Grade VII work next year should notify the principal before the end of the term.

The J. W. A. of St. Alban's, held a very successful tea and pantry sale on Saturday, June 9th. The pantry table was loaded with good things and was tastefully decorated with the colors of the club, orange and black. The tea tables also looked very nice and petite. Those who attended congratulated the girls on their excellent showing and the tastefulness of the display.

Antrobus' Sell Good Shoes

### AT THE HOSPITAL

Cases admitted to the hospital for treatment from Sunday, June 3, to Saturday, June 9, totalled nine.

Mrs. Leon Fausville was operated on on June 4, and is doing well.

Three tonsil operations were performed during the week. On June 8 Alex Redoff was admitted suffering from broken ribs, the result of an accident in McGillivray mine, falling from a mine car across a steel rail.

Art. O'Neill, who was injured in an automobile accident about four weeks ago, has been a patient for over two weeks, an operating having been necessary to put into position a shoulder bone which had been displaced.

Miss Catherine Davidson was admitted on June 8, suffering from acute appendicitis, and was operated on the next morning, making steady progress.

Mrs. P. N. Christopher, of Blairmore, was a patient.

Mrs. Robert Morris returned home from hospital during the week.

### Visit Lundbreck

A nice run by car from Coleman in the evenings or on Sunday is out to Lundbreck, past the falls, which always cause even those familiar with the spot to pause and watch the water tumbling down the gorge like a miniature Niagara, and then on into the village, where a very comfortable and inviting refreshment parlor—the Red Tub Tea Room—awaits you enter. It makes an ideal evening trip or during the afternoon and the return as you approach the mountains is a glorious sight.

### Personal and Local

Mr. and Mrs. Thos. Johnson left on Tuesday for Drumheller, to visit their two sons, Tom and Fred. They expect to be away for about ten days.

Miss Cassie Willy returned on Monday afternoon from Calgary Normal school, spending the week-end with friends at Lethbridge on the way down.

Miss Catherine Davidson passed her examinations in pianoforte, held under the direction of the L. R. A. M., with honors.

W. J. Harris, of Coleman, is offering a gold medal for competition at the Bellevue Horticultural Society's exhibition, for a painting of Lundbreck Falls. Prize lists may be obtained from the secretary, John Curry, Bellevue.

The Women of Mooseheart Legion held a very successful Whist Drive and dance in the Moose Hall on Monday, June 11th. Winners of the first prizes were Mrs. Duffield and Mr. Kpolka; second Mrs. Derbyshire and Mr. Pykila; booty (ladies) Mrs. Senk and Mrs. R. Graham; floating prizes, Mrs. Kilgannon and Mr. Carp.

QUALITY is apparent in the longer, lower, more beautiful bodies of the "Bigger and Better" Chevrolet — quality such as only Fisher craftsmanship and Fisher steel-and-hardwood construction can impart.

And that same impressive standard of quality extends clear through the "Bigger and Better" Chevrolet — down to every last detail of its design and construction.

It is Chevrolet's insistence upon quality that provides the smooth, effortless power of the "Bigger and Better" Chevrolet engine — that gives you such a swift, flashing getaway when you step on the gas — that assures you such safety when you apply the non-locking four-wheel brakes — that gives you so much real motoring pleasure for so many thousands of miles.

It is quality that makes the "Bigger and Better" Chevrolet the world's most luxurious low-priced car — quality that makes it the world's most outstanding value in the low-priced field. Accept no verdict but your own. Weigh no evidence but that of Chevrolet's own performance. Judge Chevrolet quality for yourself — by taking a drive today.

The C.M.A.C. — General Motors' own deferred payment plan affords the most convenient and economical way of buying your Chevrolet on time.

WORLD HAPPENINGS  
BRIEFLY TOLD

A bill introduced in the legislature of New Brunswick prohibits the erection of advertising billboards of any kind along the highways of the Province.

In the United States, Canada and Newfoundland the Carnegie Foundation has paid about \$18,000,000 in pensions to college teachers since 1905.

Canada's acceptance of the principle of Frank B. Kellogg's Canadian and Newfoundland the Carnegie Foundation has paid about \$18,000,000 in pensions to college teachers since 1905.

Z. McMillan, assistant deputy minister of agriculture in the Alberta Government, died recently, following a stroke. The late Mr. McMillan was a horse at Lakeland, Ont., in 1878. He came West in 1899.

Captain Charles Kingsford-Smith, the Australian flier, lived in Vancouver with his family from 1903 until 1912. The family came from Australia, returning there after nine years. The father, W. C. Kingsford-Smith, and the flier's elder brothers were in business while in Vancouver.

Major-General J. H. MacBrien received a telegram offering him a Medal for personal use in connection with his work on behalf of aviation in Canada. The donor is Sir Charles Wakefield, C.B.E., known as the patron saint of aviation in England.

Sir George Frampton, the noted sculptor, who died recently, executed the Victoria memorial in Winnipeg. Other Victorian memorials from his hand are to be found in cities as far apart as Leeds, Newcastle and Calcutta. Sir George Frampton was also responsible for the memorial to Nurse Cavell.

W. D. Gregory, prominent Toronto barrister, announced that he would not accept the "K.C." offered him by the government. This is the second time that Mr. Gregory has refused this honor, the Drury government having offered it in 1921. "I feel strongly that the practice of giving certain barristers precedence is out of harmony with the Democratic standards that generally prevail in Canada," said Mr. Gregory.

## Wool Prospects Good

Substantial Increase in Export of Wool From Canada

A very substantial increase is to be noted in the export of wool from Canada in the last fiscal year. This increased from 2,223,851 lbs. worth \$1,538,000 the year before, to 11,140,101 lbs., worth \$3,145,207.

According to the Canadian Co-operative Wool Growers, Limited, wool prospects are very good with the condition of the new wool bright and the shrinkage average. Foreign market conditions are also reported excellent.

## No More Idle Boast

Canada Holds Supremacy in Realm of Poultry

Poultry raisers in Canada are "gitting on top of the world"—at least on top of the chicken world.

The World's Poultry Congress, at Ottawa, was a manifestation of Canada's supremacy in the realm of poultry. This is no mere idle boast.

We have the best egg grading laws in the world. We have a system of record of performance for poultry that is indeed unique and highly beneficial. Canada boasts of the champion laying hen; and what comes nearest to the poultry raiser, perhaps, is that Canadians are almost insatiable in their egg eating habits. In less than ten years the consumption per capita has increased by approximately ten dozen eggs. We are now consuming eggs in Canada at the rate of 2 1/2 dozen per capita, and this commendable habit, a result, no doubt, of our efficient egg grading law, is a boon to the whole poultry industry.

We are marching forward steadily in the matter of poultry husbandry. It is being appreciated more and more how breeding and selection will boost production. Flock owners are demanding eggs and chicks from selected parents that are known to be good layers, and more than that, known to produce eggs that grade high because of size and quality. It is no longer necessary to purchase eggs or day-old chicks that are little more than question marks. We have progressed far enough so eggs and chicks of known quality are available, and that is the kind poultry raisers should demand.—Farmers Advocate.

## Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1928

(Continued)

Before entertaining us to lunch Mr. Marsh gave a very informative and comparative talk on the British bacon industry, illustrating his remarks with a number of slides of bacon from many different countries and special reference was made to the Canadian industry.

From the Marsh and Baxter plan we proceeded direct to Birmingham, where we were received by the Lord Mayor, Alderman A. H. James, C.B.E., J.P., after which we were taken through the magnificent City Hall and shown some of the art treasures there. In the evening we saw a charming musical comedy, "Up with the Lark," a block of the best seats in the house having been reserved for us.

Sunday was spent quietly in Birmingham, our literary inchoating motor tour of the environs of the city and a talk on Denmark by Mr. J. Nugent Harris of London. Mr. Harris had lived for some years in Denmark, and his love for that country was shown through his delightful address, which was accompanied by a remarkable selection of Danish slides.

Monday morning we continued our tour of the Birmingham Market, we proceeded south to Kenilworth Castle, one of the most extensive royal ruins in England. Kenilworth dates from 1120, and was presented in 1362 by Queen Elizabeth to her favorite, Robert Dudley, who was wont to entertain there in magnificent style.

Our next stop was in magnificent Warwick Castle, described as the "most beautiful and complete of its kind in the world." It was founded in 1066, occupied by the Warwick family. Warwick is a fine old country town with winding streets, many fine and ancient buildings. The castle, which was visited by some of our party, dominates the town. The castle dates from the 10th century although the present castle is 16th century.

Shakespeare's country is a few miles from Warwick. The house in which Shakespeare was born remains little altered, and wandering through the rooms we saw on walls and ceilings the signatures of many famous visitors, amongst them Scott, Charles Dickens and Browning. The village of Stratford-upon-Avon, Shakespeare's birthplace, is about a mile away. It was a delight to visit this town, which has served old place, today the property of the nation. The cottage contains much of the old furniture and many of the old fittings. We also visited Holy Trinity Church, set amid the trees on the bank of the Avon. Here Shakespeare is buried and here also is the grave of his wife. The font at which Shakespeare was baptized still to be seen in this church and the parish register, containing a record of his birth on April 23rd, 1564, and of his death on April 23rd, 1616, is also preserved.

Our stay at Oxford was short, but we were fortunate in being able to stroll through the grounds of the colleges and in seeing the memorial to the poet Shelley. The statue, beautifully wrought, shows the drowned poet lying exactly as he was found after having been washed up by the sea. When first up to his stark realism created a sensation.

Our next stop was at Windsor Castle, which is still used as the residence of the King of England. Here we were privileged in seeing the State Apartments, the magnificent rooms of which we failed to describe.

The castle overlooks the River Thames and has been the place of residence of English kings for centuries. Here James I., of Scotland, King John of France and Henry II., of Scotland, were held prisoners. And in one of the gardens James I. saw from his prison how his future wife.

A vault in the castle in which repose the remains of Henry VIII., Charles I., and Queen Jane Seymour. In the afternoon we visited the house of the King's Private Secretary, and her daughter, Princess Alice, are buried in Frogmore Mausoleum some miles from the castle.

market, and a great pleasure to learn that some of the Canadian apples had won a leading place in public favor.

Our engagement was to visit the Cockspur Street offices of the Canadian National Railways, where we were cordially received by Mr. C. J. Smith, the European Vice-President, together with his department staff. The run of this fine building, owned by the C.N.R., was given to us, and we had the pleasure of seeing the latest copies of Canadian papers. An interesting feature of the fine office, which house a busy staff of some hundred people, is a magnificent mural frieze by Frank Brangwyn, R.A. (To Be Continued.)

### CHAPTER XXV.—Continued.

Sam had been in on law courts. He had listened to many learned friends disagreeing with other learned friends, and he had become somewhat of a learned friend himself. He had one rule, "admit nothing—deny everything—remember you were not there when it happened." So, when a well-dressed young man came asking for a Flintheart girl with red hair, Sam knew nothing. In Sam's little sphere the relations between men and women were elemental and simple. Maybe the police wanted his red-haired girl—that might be. Well Sam did not want to lose her, she was a good girl, honest girl—she rang up the right change. Sam did not usually trust any white girl with change, but he was glad now that he had found one whom he could not catch, for it might be she was honest all the time.

"No," Sam did not know—Sam did not know anything. Sam did not tell Helmi, either, "nice girl, Helmi—wants fella she could get pleasure out of, gettin' nice girl all excited."

Helmi went back to the "Good Eats Cafe" one day to see if it would be possible for her to be given longer hours. The dollar a night was not going to be sufficient for her needs. Her room rent was fifteen dollars a month, and even at that she suspected the Corbets were paying some of it. She would like to go to work at two o'clock in the afternoon if Sam could arrange it. He had been away for a few days and another Chinaman had been in charge.

When Helmi arrived old Sam was at his accustomed place behind the desk, very elegant in a new black suit and a white tie. He wore a white flower in his buttonhole, and resembled a church usher on Mother's Day. Helmi remembered how they looked

in Miss Abbie's church. He was very friendly with her, and bowed cavalierly over her head. Helmi had learned to suspect polite men of being drunk, but old Sam was always sober. The cafe, too, was festive in its appearance. Flowers in bloom were on the tables. A drooping chrysanthemum in the window rained its crimson and purple blossoms down like a spraying fountain, and squares of embroidery hung on the walls. Helmi wondered at the changes. It must be some Chinese holiday, she thought.

Sam came around from the desk to greet her, and she noticed further improvement—Sam had false teeth, with some gold ones. His nails were daintily manicured and his hands heavily perfumed. "Nice old-fashioned girl," he said, shaking her hand sideways; "good girl, really, old Sam."

"Mrs. Sam—Sam—drive big car—my girl."

As he spoke a big car with silver mountings drew up to the curb, and a lady in a scarlet suit came out. She came into the "Good Eats Cafe," filling the doorway with color, like some strange tropical bird. Helmi's eyes were so dazzled by the vision that in her admiring survey she had not yet reached the face.

A short came from under the drooping black hat, and the beaming lady bore down upon Helmi. "Helmi, my love, come to me! I always knew I would find you."

"Rose Lamb!" cried Helmi, breathless with excitement. "Rose, are you?"

"Hush," cautioned Rose, dimpling and drawing her shoulders up. "I was never in. You and I met at a Young Ladies' Seminary—no tradesman's daughters, know—remember! Not that good old Sam mind—he's been in jail, and it makes them broad to go to jail; but for the sake of my social position, mum's the word. Sam, have you two please. Sit down Helmi, and let me look at you."

De mure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

"snow—but I drifted! Well where have you been?" Helmi told her.

"Married? That's bad. But I knew it. I saw it in you—you were that kind. And your man has some sense, I'm afraid, temporarily. He is only a miser—let him go—its beastly poor pay, I bear."

"But I want him to come back," said Helmi. "I love him, Rose."

"Ain't that like you, Helmi? Of course you do, and you have a baby, and I suppose you keep it too."

"I sure do," said Helmi.

Sam Lee had gone into the kitchen and Helmi leaning close to Rose, said: "Rose, did you marry old Sam?"

"Kid, you've said it," replied the bride; "sure did—lessar, ring and all. Sam Lee, widower, Rose Annabel Lamb, spinster—Anglican clergyman doing the job."

"Rose, how could you? He is not only a Chinaman, but old—very old; he must be at least sixty."

"Sixty?" Rose almost shouted. "Don't kid yourself—he's eighty, I wouldn't look at anyone only sixty—he might outlive me. Sam is safe—he'll snuff out like a gentleman. Little Rose, all alone—think of it—some of those forty thousand bones. How's that?"

"No good," said Helmi, shaking her head. "No good."

"Kid, I couldn't work. I hate dish-water and I couldn't scrub—it always made my nose sore. I hate work and what could I do? If I had lots of money I'd run straight. Old Sam is so bad, and the gray car is a pippin."

Come and see our house, Helmi; it's swell—rugs of blue and rose, with a little tile house in the corner; tapestries in gold blossoms, lamps! Helmi's eyes were so dazzled by the vision that in her admiring survey she had not yet reached the face.

A short came from under the drooping black hat, and the beaming lady bore down upon Helmi. "Helmi, my love, come to me! I always knew I would find you."

"Rose Lamb!" cried Helmi, breathless with excitement. "Rose, are you?"

"Hush," cautioned Rose, dimpling and drawing her shoulders up. "I was never in. You and I met at a Young Ladies' Seminary—no tradesman's daughters, know—remember! Not that good old Sam mind—he's been in jail, and it makes them broad to go to jail; but for the sake of my social position, mum's the word. Sam, have you two please. Sit down Helmi, and let me look at you."

De mure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

The boom of life went on with its weeping, but from Helmi's life the golden thread had gone. But, of course, the flying shuttles cannot stop to look at ends. The doom of living the best it can with the threads its shuttles are able to bring, but it takes no responsibility for the pattern.

### CHAPTER XXVI.

Mrs. Kalinski and Mrs. Corbett were having a cup of tea in the latter's big room one afternoon when Mrs. Corbett had finished her duties as janitor's wife who could be got by the hour to "do out" rooms for the tenants.

"I've turned out Mrs. Rowan and Mrs. Slider today, given Mrs. Brown a lick and a promise, and put Mrs. Flickdaff off until tomorrow," said Mrs. Corbett, as she set the peanut butter and strawberry jam on the table and proceeded to cut slices from the loaf. Mrs. Kalinski was still "waiting."

"It's a long time—the last month," said Mrs. Corbett soothingly, every day bringing it one day nearer, and it's yourself has everything ready and fine and nothin' to do but to hop into bed and call the neighbors and good old Dr. Eckhardt. I never saw a woman any tenderer than you are, with the name and all!"

(To Be Continued.)

The worst thing about a man who is discouraged is that he can't be encouraged any again until he has discouraged everybody else.

Badminton players find a drink of hot tea of great benefit after a strenuous game. In leading Badminton clubs of Canada, Red Rose tea is a great favorite. No other tea offers such brisk, zestful flavor and rich quality. Put up only in bright, clean aluminum packages.

### Made Himself Human Carrier

Doctor Missionary From China Infected Himself With Germs To Combat Disease

Carrying the germs of disease in a glass bottle is much more comfortable than carrying them in the body, according to Dr. C. H. Barlow, doctor-missionary from China, Dr. Barlow, who has spent the past twenty years in the Orient, has tried both methods and, therefore, regards himself as an authority.

"Thousands of lives are lost every year among Chinese who are foolish enough to eat the lung, or water nut, in the raw state," said Dr. Barlow on arriving at Victoria recently from the Orient. "The disease claims its victims usually about three years after infection, and it occurred to me that during that period there surely should be some way of checking the thing and making the patient well. But there were no means of examining the parasites in China; no microscope powerful enough."

"I remained for me to take the germs to the United States. I tried separating the germs and putting them in bottles, but they died on the way across the Pacific. The only way out seemed to be to find a human carrier. I chose myself, infected myself with the germ and then hastened to the United States. I was cured, more or less, but I still feel effects of the disease sometimes."

Since that first trip, however, Dr. Barlow has discovered a more convenient way of carrying the germs. He keeps the parasite eggs alive in a bottle by a special contrivance, and when he landed here he had dozens of them safely sealed in glass.

"We're making progress towards eradication of the disease," the doctor stated confidently. "We had 900,000 at our disposal, we could stamp it out altogether."

### Our Foreign Words

How Few People Know That Hundreds Are Used Every Day

How many foreign words do you use in a day? Perhaps hundreds. It is true that by usage many words have become part of our own speech, but pool is Keltic, ill is Scandinavian, yacht is Dutch, while German, sausage is Greek, and extra is Latin.

Nearly every military term is French, grande is Spanish, macaroni is Italian, caele is Portuguese, chintz is Hindi, like is Persian. Sabbath comes from Hebrew, alcohol is Arabic, both is Turkish, saga is Malayan, and tea is Chinese.

Sores Heal Quickly.—Have you a persistent sore that refuses to heal? Then try Dr. Thomas' Eclectic Ointment in the dressing. It will stop sloughing, carry away the proud flesh, draw out the pus and prepare a clean way for the new skin. It is a recognized healer among old and numbers of people can certify that it healed where properly applied.

"You say he's taking an ocean voyage for his health? What's the matter with him?"

"Overwork, trying to earn enough money for an ocean voyage."

For Rheumatism use Minard's Liniment.

An artificial lake three miles long and as beautiful in its surroundings as any natural lake in the country is part of the North Wales scheme for providing electric power.

### SUMMER COMPLAINT

Nearly Lost Her Little Girl

Mrs. Theodore Rivett, Anthony, Ont., writes: "Last Fall I nearly lost my little girl as she was suffering terribly from summer complaint. She became very sick and weak; had no appetite, and could hardly walk across the room without falling down. At last my mother advised me to get a bottle of

D'FOWLER'S EXTRACT OF STRAWBERRY

and after she had taken a few doses she was relieved.

I also send it a grand remedy for cramps, and would not be without a bottle of it in the house for anything."

Has been on the market for over 50 years; put up only by The T. Milburn Co., Limited, Toronto, Ont.

## Teeth and Health

Insured By The Canadian Dental Hygiene Council  
By The Saskatchewan Dental Society

### CROOKED TEETH

Nature is no bungler; but plans wisely. So it is that she has intended teeth should occlude, or come together, in certain definite relationships, with each interlocking as "the cogs of two wheels which work in harmony."

But quite frequently her aim is thwarted, and there is an abnormal relationship known as mal-occlusion. Many and varied causes as we have been cited contribute to this condition as: meddlesome extractions; decayed shedding; tardy eruption; improper masticating habits; faulty diet; deforming habits of the young child; and general diseases affecting tooth development.

But there is a type of mal-occlusion, without the so-called "crooked teeth," which may be in fact be exceptionally well formed and placed normally in the arch, so that in this type of arch "per se" is at fault, either exhibiting a deformity, or being in improper relationship to its

Mal-occlusion may be very noticeable, evincing a protruding or retruding jaw, or facial deformity; but again, the facial contour may not be altered from normal to any appreciable extent.

Apart from this relationship to the shape of the jaw, however, mal-occlusion may lead to serious disturbances of the teeth themselves. It may have done to this condition that one or several teeth are receiving excessive stress, resulting in a poor condition of the enamel, developing the tooth, or teeth, and mending the life of the teeth involved.

Mal-occluded teeth that are not functioning properly through disease, may be weakened structurally, leaving them more prone to decay; and in any event, they are not receiving the benefits of normal tooth exercise or the normal cleansing through exhaustive masticatory movements, which, after all, is the best defence against the forces of tooth decay.

## NO BETTER MEDICINE FOR LITTLE ONES

Is What Thousands Of Mothers Say Of Baby's Own Tablets

A medicine for the baby or growing child—one that the mother can feel assured is absolutely safe as well as efficient—is found in Baby's Own Tablets. The Tablets are praised by thousands of mothers throughout the world. They have found mothers by actual experience that there is no other medicine for little ones to equal Baby's Own Tablets. As a mother says: "I have ten children, the baby being just six months old. I have used Baby's Own Tablets for the last ten years, and can truthfully say that I know of no better medicine for little ones. I always keep a box of the Tablets in the house and would advise all other mothers to do so."

Baby's Own Tablets are sold by all medicine dealers or will be mailed upon receipt of price, 25 cents per box, by The Dr. Williams' Medicine Co., Brockville, Ont.

### Glass Windows In Ancient Times

Art Of Glass Making Was Known To The Early Egyptians

Glass windows are not the relatively modern things they are commonly reputed to be. According to Dr. M. Bischoff, a German ceramic chemist, they were in use in ancient times. Most of the panes did not exceed 12 by 16 inches in size, though a few larger ones have been found.

Glass-making, known for many centuries in Egypt, came to Rome relatively late. During the time of Cicero, who died in 43 B.C., glass objects of any kind were rareties, and glass windows were unknown. A hundred years later most households enjoyed some, and by the time the empire was well established glass was fairly common. The famous mosaics of the later empire, notably at Ravenna and Constantinople, were made largely out of bits of glass.

### Queer Law In Venezuela

Two Horns Must Be On Every Motor Vehicle

One horn is not enough for the automobiles of Venezuela. Under the latest law double facilities for making a noise are required in that republic, a hand horn for the city and electric horn for the country.

Actual practice shows that the drivers usually do not stop for two horns, but have three, one hand operated and the other two electrical.

The button for one of the electric horns is on the steering wheel, while the other is placed on the left door of the car and is operated by pressure of the driver's knee.

Live as long as you may, the first twenty years are the longest half of your life.

Some men's only business is pleasure and the only pleasure of other is business.

A reliable antiseptic—Minard's.

## Gum-Dipped Tires Save You Money

Gum-Dipping is an exclusive Firestone process. It insulates and impraves every fibre of every cord with rubber and prevents the cords from chafing against each other.

In ordinary tires these cords are uninsulated. In flexing they chafe against each other, causing internal heat and friction which softens the rubber, causing blowouts and tire failure.

These better tires cost you no more, yet they give thousands extra miles on your nearest Firestone Dealer.

FIRESTONE TIRE & RUBBER CO. OF CANADA LIMITED

MOST MILES PER DOLLAR

## Firestone GUM-DIPPED TIRES

Builds the Only

Little Helps For This Week

"All things whatsoever ye would that men should do to you, do ye even so to them."—Matthew vii. 12.

And each shall call for the other, And each to each shall bring, To the poor a noble brother, To the good an equal friend.

— Ralph Waldo Emerson.

No curse has fallen on us till we cease

To help each other.—George Eliot.

Try to do to others as you would have them do to you, and do not be discouraged if they fail sometimes. It is much better that they should fail in obeying the greatest rule laid down by our Saviour than that they should be uncharitable.

— Charles Dickens (Letter to his son)

Win Many Prizes

The Prince of Wales challenge cup, a cash prize of \$100, and other special prizes in the children's cage breeding competition at the livestock show at Edmonton, were won by Annie May Turner, an eleven-year-old girl, who brought her calf from Cadboro Bay, Vancouver Island.

Don't Make a Toy Out of Baby

-Babies Have Nerves-

By RUTH BRITAIN

Much of the nervousness in older children can be traced to the overstimulation during infancy, caused by regarding baby as a sort of animated toy for the amusement of parents, relatives and friends. Baby may be played with, but not for more than a quarter of an hour to an hour daily. Beyond that, being handled, tickled, caused to laugh or even scream, will sometimes result in vomiting, and invariably causes irritability, crying or sleeplessness.

Fretfulness, crying and sleeplessness from this cause can easily be avoided by treating baby with more consideration, but when you can't see what is making baby restless or upset, better give him a few drops of pure, harmless Castoria. It's amazing to see how quickly it calms baby's nerves and soothes him to sleep; yet it contains no drugs or opiates. It is purely vegetable—the recipe is from Mother's Own Word in weight gold. Look for Chas. I. Fletcher's signature on the package so you'll get genuine Castoria. There are many imitations.

W. N. U. 1737

## Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has been used for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy remedy. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

## HERCULES

PERMANENT BUILDING PAPER

### SUCCESS ON PAPER

"Satisfied customers always come back." It's an old saw but its teeth are sharp as ever. Nowhere is its truthfulness more evident than where Hercules Permanent Building Paper is sold.

On one of using alone, Hercules makes satisfied customers. The roughest, the most rapid handling fails to tear or crack it.

Hercules is tested and proven on wind proof and damp proof.

Hercules will pave the way to greater success on your sales of paper. Send for a sample now. In three grades

WHEN BETTER AUTOMOBILES ARE BUILT—McLAUGHLIN-BUICK WILL BUILD THEM

## The Only Car with a Sealed Chassis—fully guarded against dirt, dust and moisture—and offering protected performance

It is the fashion of the day to place first importance on motor car beauty; and for this the alluring beauty of McLaughlin-Buick's smart, low-slung bodies by Fisher is largely responsible.

But keep in mind that you get many things besides beauty when you buy a McLaughlin-Buick. You get unequalled riding ease—vibrationless performance—and above all the unique reliability of the world-famous McLaughlin-Buick Sealed Chassis and Triple-Sealed Engine.

Every vital part of the McLaughlin-Buick chassis is enclosed in dirt-proof, dust-proof, water-tight housings to assure reliability and long life. And McLaughlin-Buick's proved Valve-in-Head Engine is fully guarded by crankcase ventilator, air cleaner, oil filter and gasoline strainer.

McLaughlin-Buick is the only car offering this twin feature as well as protected performance under all road and weather conditions. Admire McLaughlin-Buick beauty—but insist upon McLaughlin-Buick dependability. It's a wonderful thing—even in these days when all cars are assumed to be dependable.

The G.M.A.C. Deferred Payment Plan offers many advantages to buyers of McLaughlin-Buick cars.

## Busy Day For The Local Police Court

### Family Troubles in Which Son-in-Law is Storm Centre Occupies Entire Day in Hearing

A disgraceful case of assault took place on Sunday morning, when a man living in West Coleman went to the house of his wife's parents, where she was staying, and started smashing the windows and assaulting the inmates. Chief Houghton was soon on the scene, and the provincial police from Blairmore came down and took the man to Blairmore to await trial on Monday morning.

The man (Krotch) was charged before Magistrate Gresham on Tuesday morning, J. E. Gillis, K.C., appearing for the prosecution and R. F. Barnes for the defence. The hearing occupied the entire day, and conflicting evidence was heard as to the details of the quarrel and events leading up to it. The accused was sentenced to thirty days in jail, but has entered appeal against the decision, being on bail in the meantime.

The action of a man named McCartney to secure wages due from Scot for cutting timber was settled out of court on the advice of the magistrate to the defendant, Scot.

### Full Report Next Week

A full report of the annual meeting and smoker of the Rod and Gun Club will appear in the next issue. It was a very successful affair, and was attended by visitors from Pincher Creek and Bellevue, and representatives of the Fisheries branch and the Forestry service, who gave addresses, Mr. Holmes of Pincher and H. Boulton of Coleman, representing these branches. The new president elected at the meeting is Mr. John Crawford, who takes the place of Mayor Burns, and J. Rushton succeeds W. S. Purvis as secretary. Over a hundred were at the meeting, and a very good program followed.

### NOTICE

The Ladies Auxiliary of the St. Paul's United Church will hold a Pantry Sale and Tea in the Club-room on Saturday, June 23rd, from 3 to 5.30 p.m. Everybody welcome. —42—1c

The Memorial Day Service of Coleman Lodge No. 36, I. O. O. F. will be held in the Odd-fellows hall on Sunday, June 17th. All Odd fellows and Rebekahs are asked to meet at the hall at 4.30 p.m. After service refreshments will be served. (adv.)

John Petroski, employed at the McGillivray mine, was injured by a fall of coal in the room in which he was working on Monday. His leg was dislocated, and an x-ray examination will be made to determine the extent of the accident.

Alex Morrison, district deputy grand master of this Masonic district, and T. Flynn, worshipful master of Summit Lodge, are attending the grand lodge of Alberta in Calgary.

Mrs. George Kellock, Agnes and Jim, will sail on July 6th from Montreal for a visit to Mrs. Kellock's old home in Scotland.

## DIAMONDS

A good Diamond has never been a poor investment; it becomes more valuable with the passing years. For weddings, birthdays, anniversaries, betrothals and other occasions the gift should be a worthy one; Genuine, useful and beautiful. It should be something that will carry a lasting, if not a life-long remembrance. Diamonds will do this. Any selection made here will be in style and in pattern, dependable in quality and true to our reputation.
